DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the absorbant interposed between a liquid impermeable sheet and a liquid-permeable sheet (as per Claim 5) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Wada et al. (US 6,150,582).
3. With respect to Claims 1-4, Wada et al. (hereafter Wada) discloses an absorbent article comprising an absorbant layer that is made of a 50 parts weight of water-absorbent resin (i.e. hydrosates of starch-acrylonitrile graft polymers) and 50 parts weight of hydrophilic fiber (mechanical pulp) (Column 22, Lines 58-67). Because Wada's absorbant materials are the same and supplied at the same weight ratio as disclosed in applicant's specification (5-60% weight water-absorbant resin), the absorbent inherently has a water absorption of physiological saline of 60-100 g/g and a water retaining capacity of physiological saline of 45-80 g/g, wherein the water absorption rating is at least 15 g/g higher than the water retaining capacity rating.

Additionally, because the materials are the same, the absorbent inherently has the same water absorption rates and vortex time disclosed by applicant in claims 2-4.

The above rejections were made in the sense of *In re Fitzgerald* or *In re Spada*, 911 F 2d 705, 709 15 USPQ 1655, 1658 (Fed. Cir. 1990), which settles that when the claimed compositions are not novel, they are not rendered patentable by recitation of properties, whether or not these properties are shown or suggested in prior art. In other words two same compounds cannot have mutually exclusive properties and, since the compounds of Wada are identical to those as instantly claimed, they would inherently and necessarily exhibit the same properties.

4. With respect to Claim 5, Wada disclose that the absorbent layer is disposed as part of an absorbent article, wherein the absorbent layer is interposed between a liquid-permeable sheet and a liquid-impermeable sheet (Column 23, Lines 1-9).
